## **Mounting instruction**

## AIRCELL®5

TNC-Socket, screw/solder / Art. No. 7742

1. Cut off cable tail right-angled.

**5.** Move the contact sleeve as far it goes between the copper braid and the foil. Slice 5mm of the copper foil and 4mm of the foamed dielectric with a sharp knife and remove it.

**2.** Move the nut, clamping ring and rubber washer over the cable head.

**6.** Cut off the copper braid with a side cutter and move the rubber washer forward to the contact sleeve, so that the remaining braid is clamped between the rubber washer and the contact sleeve.

3. Remove 7 mm of the outer sheathing with a knife.

7. Put the inner pint onto the inner conductor and solder it. There should be left a distance of 1mm between the inner pin and the copper foil.

4. Bend copper braid upwards right-angled.

8. Insert the prepared cable end into the connector housing as far as it will go. Take two open-end wrenches 11mm to tighten the clamping nut hand-tight.
